LOCATE
Locate any asset instantly with one click in real-time

ALERT
Set a movement alert when "anchoring" an asset on the web or app
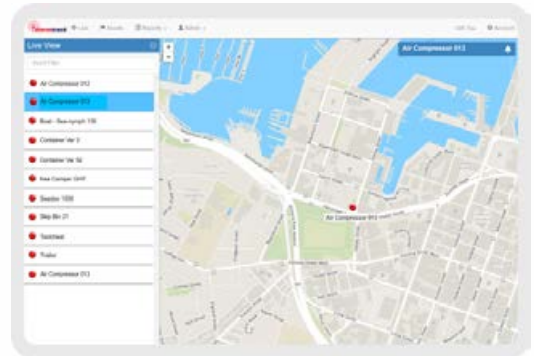

RECOVER
Switch to Recovery Mode over-the-air for frequent asset location updates

ALARMTRACK™ FEATURES

Intuitive and easy to use

What you see is what you get. Click on the icon, get that information. No searching around hidden menus and confusing techno-babble set-up screens.

So user-friendly and intuitive that you will not need an instruction manual!

Movement Alert

Easily set a movement alert for the assets next movement from the App or website. The system will send an email or SMS alert to the configured users immediately.

This feature is invaluable when you want to ensure that an asset remains where you have left it!

Recovery Mode

Recovery Mode will activate the most frequent tracking mode over-the-air (OTA). Useful when assets are misplaced or in the event of theft when assets need to be located in near real-time.

Assets can be set back to normal tracking mode over-the-air once located.

The information you need most

Manage all your Assets in one easy-to-see place. Keep detailed asset information including extended descriptions, customisable fields, installers and even a photo.
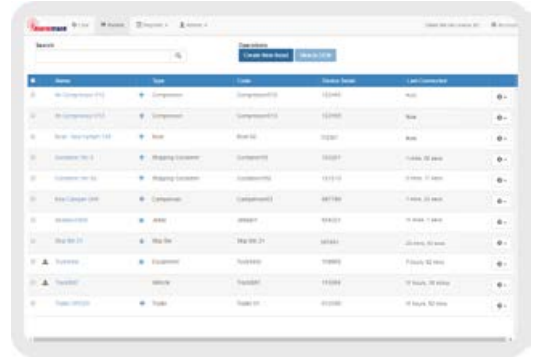

Touch-friendly live view screen

As the world becomes more mobile, touch friendly, browser based responsive software is becoming the new gold standard, a standard which ALARMTRACK™ meets and exceeds
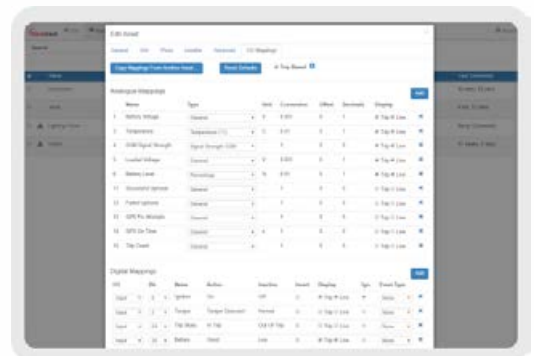

With ALARMTRACK™ you can do everything on your mobile device that you would normally do at your desktop!
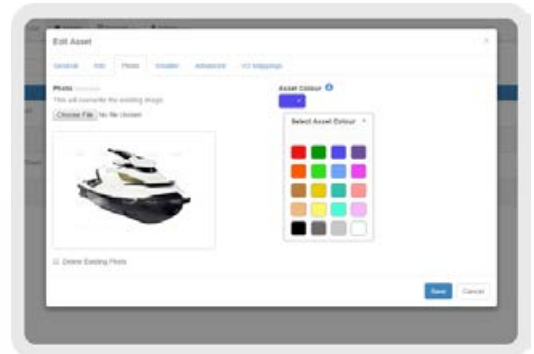

Plug & play ... Simple to configure

ALARMTRACK™ has been designed to empower the user with easy-to-use device set-up and configuration screens.

Making our software easier to use, means less support calls for our resellers.

Conveniently reports in Excel

In addition to pdf and html, ALARMTRACK™ offers extensive Excel based reports, with pivot tables embedded for data manipulation. Save your favorite reports, configure your own report formats and even preview them on screen before downloading.

No queuing, processing or waiting, just click and open!

Easy-to-schedule Reports

...or set your own trip categorization criteria. Set custom categories for trips e.g. sales, quotes, service, deliveries etc.

Easily create logbooks, business travel reports, customer service reports or any other output.

Please take a moment to tour an overview of the ALARMTRACK™ features by scrolling through the screenshot tour below:
